

Figure 1 consists of 12 scatter plots, labeled (a) through (l), arranged vertically. Each plot has 'Number of children' on the x-axis, ranging from 0 to 10. The y-axis for each plot represents a different variable, with the scale varying by plot. The variables are: (a) Age, (b) Education, (c) Income, (d) Employment, (e) Health, (f) Social capital, (g) Trust, (h) Civic participation, (i) Volunteer work, (j) Political participation, (k) Civic engagement, and (l) Social network. In all plots, the data points generally show a downward trend, suggesting that as the number of children increases, the values of these variables tend to decrease. The plots are arranged in a single column, with each plot having its own y-axis scale and label.
